## CAREER OBJECTIVE

---

I'm a self-taught Web Developer. I'm passionate about coding. I have patience & interest to learn new things & technologies. I am working on **JavaScript, React.js, OOP, and Problem-solving** ([HackerRank](#), [Codeforces](#)). I have finished more than 9 personal projects using this technology. I'm always determined to achieve my goals. I'm currently seeking an opportunity to build a long-term profession as a **Web Developer**.

## SKILLS

---

**Expertise:** Javascript, ES6, ReactJS, TailwindCSS, HTML, CSS, SASS

**Familiar:** Python, C, C++

**Tools:** GitHub, Firebase, VS Code, Adobe Photoshop, Adobe Illustrator, Canva, Figma, NPM, etc.

## PROJECTS

---

### Pixabix | ([Live link](#)) [github](#)

November 2022

- ❑ Pixabix is a responsive website with an awesome user interface.
- ❑ User can search photos & download in two different resolutions.
- ❑ Fetched all images from "Pixabay" API.
- ❑ When a user scrolls to bottom of the search page, new photo section will come with 10 new images.

**Challenges:** It was really hard to fetch all content into single page & the most challenging part was to understand "blob" concept & make a photo downloadable.

**Technology:** *ReactJS, TailwindCSS, Pixabay API, Axios, React-router-dom*

### BENJI | ([Live link](#)) [github](#)

May 2022

- ❑ Benji is a responsive NFT static website (Canva to HTML).
- ❑ It has very cute UI. This site was created for a client (Fiverr).

**Technology:** *HTML, CSS, Javascript*
